

Cyber Safety Tips

MakingSenseofSecurity.com

Post Carefully

Remember: Internet posts stay there forever. Especially with screenshots.

Browse Cautiously

One careless click can expose your sensitive information. Think before you click!

Use a Secure VPN connection.

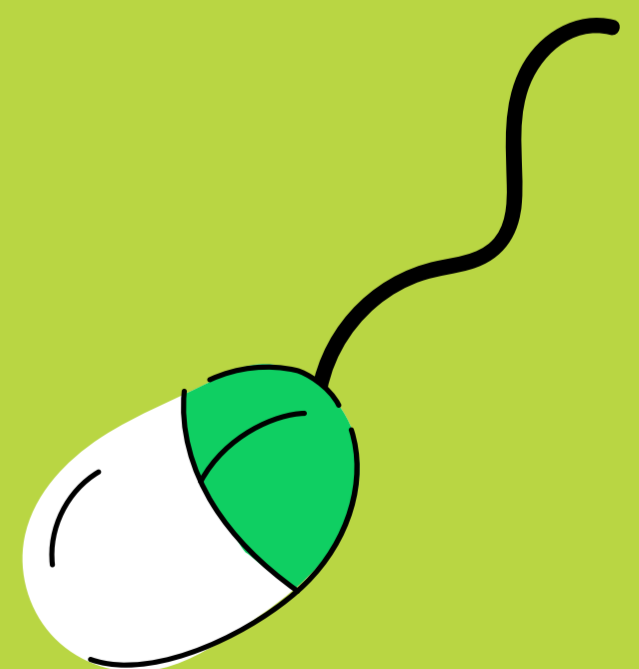

A Virtual Private Network (VPN) will ensure anonymity on the internet.

Never Share Passwords

Keep your passwords secure. Change passwords often.

Download Carefully

Avoid downloading suspicious apps or software. It may result in malware.

Stay Safe Online!
